Summary

Senior Full Stack Developer experienced in architecting and implementing scalable web applications using modern technologies. Proven ability to enhance system performance and reliability through robust cloud infrastructure and automated deployment workflows. Proven expertise in full lifecycle development, including coding, testing, deployment, and troubleshooting, while effectively collaborating with agile teams to align solutions with business objectives.

Skills

- **Web Development:** HTML, CSS, Javascript, Typescript, Tailwindcss, React, Next.js, Node, Express.js, NestJS, Strapi, Prisma, TypeORM, Java, .NET
- **Databases:** MySQL, PostgreSQL, Oracle, Redis, MongoDB
- **Cloud & DevOps:** Linux, AWS Services, Docker, Kubernetes, Github, Github Actions, Puppet Enterprise
- **Monitoring & Performance:** Dynatrace, Splunk, Zabbix
- **Project Management & Collaboration:** Agile, Scrum Methodology, Jira, Trello, Storybook

Work Experience

San Services S. de R.L. | *Senior Full Stack Developer* **Mar 2023 - Nov 2024**

- Led the development of web applications using Next.js and React, resulting in improved user engagement and performance
- Designed and implemented cloud infrastructure solutions using AWS, Kubernetes, and Docker, which enhanced system scalability and reliability
- Improved development workflows by integrating CI/CD pipelines with GitHub Actions, reducing deployment times and increasing code quality
- Provided mentorship to 15+ mid/junior developers, enhancing team efficiency and technical skills.

San Services S. de R.L. | *Full Stack Developer* **Mar 2020 - Mar 2023**

- Developed and maintained scalable web applications using React, Next.js, and Node.js (Express, Strapi, NestJS), improving user engagement and reducing load times
- Optimized databases and managed data using MySQL, Oracle, and Redis, enhancing data retrieval speed and system performance

San Services S. de R.L. | *Project Manager* **May 2019 - Mar 2020**

- Managed development projects and coordinated Agile workflows using Jira and Trello, enhancing team collaboration and project delivery efficiency
- Led the migration of legacy systems to Strapi CMS with a modern front-end stack.

San Services S. de R.L. | *System Administrator* **Jan 2017 - May 2019**

- Managed and automated infrastructure provisioning using Puppet Enterprise, resulting in improved deployment efficiency and reduced manual errors
- Maintained and monitored cloud environments using Zabbix, Grafana, and Splunk, enhancing system performance and early detection of issues
- Ensured system availability and security in Xen and AWS environments, leading to uninterrupted service and enhanced data protection

San Services S. de R.L. | *Web Developer* **Sep 2016 - Jan 2017**

- Developed and maintained web applications using CFML (Lucee, ColdFusion), React, and MySQL, enhancing user experience and application performance

Grupo Leitz | *Back-end Developer* **Jun 2016 - Sep 2016**

- Developed back-end systems and APIs using .NET and SQL Server, improving data processing efficiency and system reliability
- Contributed to database design and performance optimization, enhancing query speed and reducing server load

Education

Centro Universitario Tecnológico(CEUTECH) **Feb 2012 - Sep 2017**
Bachelor, Computer Science *San Pedro Sula, Honduras*

Certifications

- **The Git and Github Bootcamp:** 17h
- **Nextjs by Example:** 12.5h
- **Understanding Typescript:** 15h
- **NestJS Zero to Zero - Modern TypeScript Back-end Development:** 9h
